

Sometimes the difference between ordinary and amazing is where it happens. Seattle, Washington, is ANYTHING but ordinary.

Located along Puget Sound in the shadow of Mount Rainier, Seattle, known as the "Emerald City," is

a fashionable locale that offers a hip, urban environment influenced by outdoor style and activities. Seattle, now famous for the Space Needle, coffee and microchips, is a thriving port town with much to offer any visitor.

Along with our conference hosts, Karen and Gene Quandt, we extend an invitation to all of our NPD families, researchers and supporters to join the NNPDF in Seattle this summer.

Planning has begun in earnest to provide an event that will address the needs of our families while offering all the opportunity to learn the latest on NPD research and treatments.
